نادي دبي لسباق الخيل
DUBAI RACING CLUB

DUBAI DIGITAL
SYNDICATION

Grounded in tradition.
Evolved through innovation.
Ownership transformed.

VARA REGULATED

DRC PARTNERSHIP

POWERED BY TOKINVEST

WHY NOW

Racing ownership hasn't kept pace with its audience.

Syndication and shared ownership are already part of racing's DNA. The principles still hold: pooled resources, expert management, and shared upside. What has not kept pace is access. High minimums, private networks, and locked-in commitments have kept the sport closed to the many. **Dubai Digital Syndication changes the transaction layer, not the sport.**

PRESERVE INTEGRITY

The sport stays intact. The pathway modernises.

The horse comes first.

Care, welfare, and campaign quality remain central.

Professional care remains.

Training, management, and oversight do not change.

Governance stays structured.

Ownership remains organised, visible, and accountable.

Participation broadens responsibly.

The model expands access without diluting what makes racing special.

THE EVOLUTION

Built on tradition. Evolved through innovation.

VIDEO PLACEHOLDER

WHAT DDS BUILDS ON

- Shared passion and participation
- Professional training and management
- Elite bloodstock and heritage
- The thrill of race day

VIDEO PLACEHOLDER

WHAT DDS IMPROVES

- Fractional entry with lower barriers to participation
- Primary and secondary market liquidity
- On-chain transparency and reporting
- Open, regulated access without relying on private networks

FOR HORSE OWNERS

Your ownership stake, working harder.

Liquidity

Create a new capital pathway around an existing asset. Fractional stakes can be listed on a regulated marketplace without changing the underlying care, management, or campaign structure.

Control

Owners decide whether to list, how much participation to offer, and how the opportunity is structured. Owners remain central to the horse, the campaign, and the decision-making around both.

Equity

Owners retain the underlying equity position in the horse. The model is designed to sit around that equity, not replace it, with value anchored in a real horse, a real campaign, and a real ownership structure.

FOR HORSE OWNERS

More flexibility around an existing asset.

Reinvestment

Platform earnings can help offset ownership costs such as training fees, vet bills, and stable costs. The horse continues to compete while the ownership model works harder around it.

Scale

Fractional participation can support broader involvement across multiple horses or seasons without increasing total outlay to the same degree. Ownership becomes easier to extend, not harder to sustain.

FOR HORSE OWNERS

Broaden participation. Preserve integrity.

This is not about replacing owners. It is about helping owners reach new participants, communicate more clearly, and build stronger engagement around each campaign. Structured participation, clearer reporting, and regulated infrastructure create a more modern ownership pathway while preserving the standards and prestige that define the sport.

STRUCTURED PARTICIPATION

CLEARER REPORTING

MODERN OWNERSHIP PATHWAY

FOR INVESTORS

The most prestigious asset class. Now open.

Access

No private network required. Lower entry points create a clearer pathway into elite racing participation through a central, regulated marketplace.

Prestige

The digital-syndication model was proven through New Zealand experience, while the Dubai opportunity is built around Dubai Racing Club horses competing on one of racing's most recognised stages.

Structure

Institutional grade. Real ownership. VARA-regulated. Tokinvest dual-licensed as issuer and broker-dealer. Transparent on-chain reporting.

PARTICIPATION

Ownership extends beyond race day.

Ownership transforms spectators into stakeholders. Structured communications, behind-the-scenes access, and digital touchpoints deepen connection around each campaign without changing the fundamentals of the sport.

THE LIFECYCLE

From origination to trade. Every step regulated.

01 - IDEATE & ORIGINATE

Structure

Define product parameters, duration, and economic profile.

02 - ISSUE

Issue

Products are issued natively on-chain under VARA. The token itself is the financial instrument.

03 - DISTRIBUTE

List

Listed on the Tokinvest marketplace and distributed via partner platforms.

04 - TRADE

Trade

Primary and secondary market liquidity. Buy, sell, or hold on your own terms.

---

05 - REDEEM

Redeem

Structured exit through redemption services and token burn at end of lifecycle.

INSTITUTIONAL ARCHITECTURE

Every layer. Accounted for.

VARA

Regulation. Virtual Assets Regulatory Authority. Dubai.

Dubai Racing Club

Administration. Institutional validation. DRC partnership. Meydan.

Tokinvest

Platform infrastructure. VARA-licensed Issuer + Broker-Dealer. First ARVA approved.

Evolution Stables

Proof of the model working in practice. Early digital-syndication experience from New Zealand that helped shape the pathway now expressed as Dubai Digital Syndication.

WHY THIS MATTERS

A stronger participation model for racing.

New pathways for owners

Broaden participation around an existing asset while preserving control and integrity.

Clearer access for investors

Create a more legible and structured pathway into elite racing participation.

Deeper engagement around campaigns

Turn race-day attention into a longer, more connected ownership experience.

Sustainable growth

Support broader relevance and participation without compromising the standards of the sport.

WHY DUBAI

A natural place to lead the next chapter.

Prestige

Dubai already carries global racing authority and recognition.

Visibility

Few stages offer the same international audience and spotlight as Meydan.

Regulatory clarity

Forward-looking digital-asset regulation creates structural confidence.

Innovation fit

Innovation layered onto an already world-class stage strengthens the model.
